Environmental and Sustainability Policy

Document: AHM-ENV-01

Revision: 1.0

Process Owner: Chief Executive Officer

Intended Users: Alhamadah Almutahida. All employees and business associates.

Last updated: August 2026

CONTENTS

1. PURPOSE
2. SCOPE
3. COMMITMENTS
4. IMPLEMENTATION
5. RESPONSIBILITIES AND REPORTING
6. EFFECTIVE DATE

1. PURPOSE

- 1.1. Recovering metal is our business, so the environmental case and the commercial one point the same way. This policy sets out how we make sure material leaving an industrial site returns to production rather than to ground.
- 1.2. We work to the environmental laws and regulations of the State of Kuwait.

2. SCOPE

- 2.1. This policy applies to every director and employee of Alhamadah Almutahida, and to our business associates, including agents, suppliers, subcontractors, hauliers and any other party performing services for or on behalf of the company.
- 2.2. It applies at our yard, at our office, and at any client site our people or our vehicles enter. Where a client operates a stricter standard, the client's standard applies.

3. COMMITMENTS

- 3.1. What leaves our yard should go to a furnace. Landfill is the last resort, not the default.
- 3.2. We give effect to these commitments through the following, which include but are not limited to:
 - a) **Recovery First**
Material is recovered, graded and returned to mills and foundries as feedstock. Disposal is considered only for what cannot be recovered.
 - b) **Segregation at Source**
We separate material on the client's site wherever the site allows it, because material separated at source is material that can be recovered.
 - c) **No Open Burning**
We do not burn cable or any other material to recover metal, on a client's site or in our own yard, under any circumstances.
 - d) **Hazardous Residues**
Oils, fluids and contaminated residues are separated from metal and passed only to routes authorised to receive them.
 - e) **Containment in Transit**
Loads are covered and secured so that nothing is lost on the road between a client's gate and ours.
 - f) **Housekeeping**
The yard is kept in order and spills are contained. Housekeeping is treated as part of the work rather than as something done after it.

4. IMPLEMENTATION

- 4.1. Material is assessed on arrival and routed to the correct process: sorting, cutting, shearing or baling, and separation of anything that is not metal.

- 4.2.** Where a client requires evidence of how material was handled, the record that follows each load from collection to disposal or sale is provided.

5. RESPONSIBILITIES AND REPORTING

- 5.1.** Responsibility for observing this policy rests with every person it covers. Oversight rests with the Chief Executive Officer, and day to day implementation with management.
- 5.2.** Anyone, whether employed by the company or not, may report a breach. A person who reports in good faith is given confidentiality and is protected from any adverse consequence for having reported.
- 5.3.** Reports may be made to the Chief Executive Officer directly, using the telephone number printed at the foot of this document.

6. EFFECTIVE DATE

- 6.1.** This policy was approved by the Chief Executive Officer and is effective from the date shown below. It is reviewed at least once a year, and whenever the work, the law or a client requirement changes.

Effective from **31 August 2026**

Mohammed Sajid

Chief Executive Officer
