

Alhamadah Almutahida

SCRAP METAL TRADING

Company Profile

We buy scrap from industrial sites, contractors and demolition, process it in our own yard, and supply graded material to mills, foundries and export buyers.

01 The company

A scrap metal trading company operating from the Mina Abdallah Industrial Area in Ahmadi, Kuwait. The business buys, processes, supplies and exports ferrous, non-ferrous and industrial scrap.

Material is received at the yard, weighed, sorted and graded, then cut, sheared or baled to the form the buyer specifies. Processed material is supplied to mills, foundries and manufacturers, or loaded to container for export.

On the disposal side, oil and gas operators, contractors, demolition companies and industrial sites. On the supply side, steel mills, foundries, manufacturers, traders and export buyers.

Activity	Buying, processing, supply and export of ferrous, non-ferrous, cable and industrial scrap
Opening hours	Every day, 7am to 5pm
Enquiries	Every enquiry is answered within 24 hours

02 Message from the CEO

At Alhamadah Almutahida, we approach scrap metal trading with a long-term perspective. We believe responsible recovery contributes to both commercial value and environmental sustainability. Through disciplined sourcing, accurate grading, transparent transactions, and reliable service, we work to create value for our suppliers, customers, and industry partners.

Our principles are straightforward. We conduct our business with integrity, maintain transparent commercial practices, and honour our commitments. We believe strong business relationships are built through consistency, accountability, and trust.

Our ambition is to establish Alhamadah Almutahida as a trusted name in Kuwait's scrap metal industry, serving industrial operators, contractors, suppliers, and buyers with professionalism and reliability.

We measure our success by the confidence our partners place in us and by the relationships we build over time.

We remain committed to earning that trust through the quality of our work and the standards we uphold every day.

Mohammed Sajid

Chief Executive Officer

03 Mission and vision

MISSION

To take metal out of industrial sites in Kuwait and return it to production. That means paying for material as what it actually is, handling it so the client can account for every load, and supplying mills and foundries in the condition they specify.

VISION

To be the yard that operators and contractors in Kuwait approach first for disposal, and that buyers approach first for graded material, on the strength of accurate weights, clear documentation and consistent grading.

04 What we do

Four activities, carried out in sequence on the same site.

01

We buy scrap

We buy ferrous and non-ferrous scrap from industry, contractors, demolition and the public. Material is weighed and graded on arrival.

02

We process on site

Sorting, grading, cutting, shearing and baling in our own yard, to the form the buyer specifies.

03

We supply mills and foundries

Processed material is supplied to steel mills, foundries and manufacturers to the grade and size they specify.

04

We export by container

Sorted material is loaded and shipped by container to overseas buyers, with the paperwork handled from the yard to the port.

05 How we work

Everything is weighed

No load leaves a site or the yard without a weight ticket. The client's figures and ours reconcile against the same record.

Priced on grade

Material is settled grade by grade rather than averaged into a single rate for the lot, which is where value is usually lost.

Segregated at source

Separating on the client's site rather than in our yard protects both the value of the material and the accuracy of the settlement.

One point of contact

Both sides of the trade are handled from the same office, and the person who quotes the job is the person who follows it through.

We work to site rules

Access, permits, inductions and working hours are set by the client. Our crew works to them, and mobilisation waits until they are in place.

Recovered, not discarded

Material is processed back into feedstock for mills and foundries. What leaves the yard goes to a furnace, not to landfill.

06 Materials we handle

Ferrous scrap

GRADES HANDLED 10

GRADE	FORMS HANDLED
Heavy melting scrap	HMS 1 and HMS 2, cut to furnace size.
Structural steel	Beams, channels, angles and columns.
Pipes and fittings	Carbon steel pipe and pipe fittings.
Plates	Steel plates and plate cuttings.
Rebar	Reinforcement steel from demolition and offcuts.
Sheets, coils and wire	Steel sheet, coil, wire and wire rod.
Cast, ductile and wrought iron	Engine blocks, pipe and machine bases.
Turnings and punchings	Steel turnings, borings, punchings and stampings.
Machinery, marine and demolition steel	Plant, automotive, ship and demolition steel scrap.
Rail steel	Rail and railway steel.

06 **Materials we handle**
Non-ferrous scrap

GRADES HANDLED 9

GRADE	FORMS HANDLED
Copper	Tubes, radiators, bare bright wire, busbars, sheets, plates and turnings.
Aluminium	Extrusion, taint tabor, used beverage cans, radiators, sheets, foil, wire, wheels, castings, turnings and profiles.
Brass	Solids, turnings, radiators, valves, fittings, sheets and mixed.
Stainless steel	All grades. Pipe and fittings, plates, plate cuttings, sheets, coils and turnings.
Bronze and gunmetal	Bronze and gunmetal scrap.
Lead	Sheet, weights and battery lead.
Zinc	Zinc scrap and die-cast.
Tin	Tin scrap.
Magnesium	Magnesium scrap.

06 **Materials we handle**
Cable and wire scrap

GRADES HANDLED 6

GRADE	FORMS HANDLED
Copper power cable	Low and medium voltage, graded on recoverable copper content.
Armoured cable	Steel wire armoured cable, whole or stripped.
Aluminium cable	Overhead line, power and service cable.
Control and instrument cable	Multicore control, instrumentation and signal cable.
Data and communication cable	Telecom, coaxial and network cable.
Wiring harness	Loom, panel and machine wiring.

06 **Materials we handle**
Industrial scrap

GRADES HANDLED 6

GRADE	FORMS HANDLED
Motors, transformers and generators	Complete units or stripped.
Industrial machinery and equipment	Plant and production equipment.
Radiators and heat exchangers	Copper, brass and aluminium units.
Catalytic converters	Assessed on inspection.
Batteries	Scrap lead acid batteries.
Electrical and electronic scrap	Panels, switchgear and boards.

07 Disposal contracts

Five stages, in the order they happen on site.

01

Site clearance

Decommissioning scrap, redundant plant, pipe, structural steel and cable removed from your site with our own transport and labour.

02

Segregation at source

Material is separated into ferrous and non-ferrous streams before it leaves your site, and each grade is accounted for on its own.

03

Weighing

Every load is weighed and a weight ticket is issued against it, recording gross, tare and net.

04

Documentation

A record follows the material from collection through to disposal or onward sale.

05

Settlement

Settled grade by grade against the recorded weights, in whichever direction the balance falls.

RECORDS

Every load is weighed and issued with a weight ticket, and a record follows the material from collection through to disposal or onward sale. Documentation is provided to clients on request.

08 Export markets

Material is loaded to container and shipped to buyers overseas. Documentation is handled from the yard through to the port.

South and Southeast Asia

India · Bangladesh · Singapore ·
Malaysia · Indonesia · Vietnam

East Asia

China · South Korea · Taiwan

Gulf and Middle East

United Arab Emirates · Saudi
Arabia · Qatar · Bahrain · Oman

Mediterranean

Turkey · Egypt

Loading ports

Shuaiba and Shuwaikh, depending on the shipment.

Where material goes

Graded material is supplied to buyers inside Kuwait and loaded to container for export through Shuaiba and Shuwaikh. Export buyers are in the Gulf and the wider Middle East, South and Southeast Asia, East Asia and the Mediterranean.

09 Leadership

Named, so an enquiry reaches a person rather than a switchboard.

10 Policies and conduct

Five policies govern how the company works, and each is published as a controlled document a client can file, attach to a tender and quote back to us.

POLICY	WHAT IT COVERS	REFERENCE
Occupational Health and Safety Policy	How we keep our crews and our client's site safe while we work on it.	AHM-HSE-01 · Rev 1.0
Environmental and Sustainability Policy	How we return metal to production, and how we handle what cannot be recovered.	AHM-ENV-01 · Rev 1.0
Anti-Bribery and Anti-Corruption Policy	Our prohibition on bribery in any form, including adjusting a weight or a grade.	AHM-ABC-01 · Rev 1.0
Human Rights, Labour and Diversity Policy	Forced labour, child labour, recruitment fees, passports, wages and equal treatment.	AHM-HRL-01 · Rev 1.0
Code of Business Conduct and Ethics	How material is described, how agreements are honoured, and what a client can expect.	AHM-COC-01 · Rev 1.0

All five are downloadable from the website, in English and in Arabic.

11 Contact

Correspondence goes to the office in Fahaheel. Material goes to the yard in the Mina Abdallah Industrial Area.
